**Make more as a diesel tech.
You can start to earn an average of \$50,000 per year.**

It's a skill set in the growing technology of today's trucks; do you want to be a part of it?

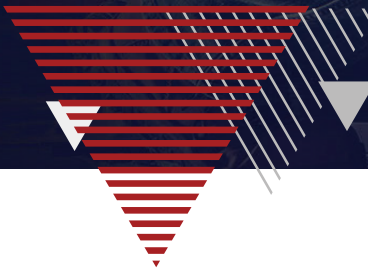

WWW.NEXTGENTRUCKING.ORG

The need for diesel mechanics shows zero signs of slowing down. The career is expected to grow by 8% into 2030.

Why diesel over automotive?

**It's the Pay
It's the Life
It's the Future**

The professionals needed to repair heavy-duty trucks and commercial vehicles require a set of skills distinct from 40 years ago. It's high-tech and involves more training than ever before. The U.S. Bureau of Labor Statistics estimates that there will be 28,000 net new openings for diesel service technicians and mechanics each year, for the next decade.

Diesel Lifestyle

As a diesel tech you have the self-satisfaction of diagnosing and repairing a truck that most cannot even imagine where to start. Earn a great living, working in large open shops with state-of-the-art equipment.

When the next load of freight must go, you can be proud to say, "I fixed that truck to keep America going!"

Technology & Environment

Today's trucks have the newest technology with over 30 plus computers and 200 sensors to control engine, transmission and driver safety features like lane guidance.

Pay & Benefits

Average diesel technician base pay = \$50,500 per year. Some starting pay is as high as \$28.00 per hour based on experience level.

Many dealerships and shops offer paid training, sign on bonuses and monthly incentives. Paid time off, flexible shifts, major medical benefits.

Tool incentives and programs.

Apprenticeship Training Program
