Data Scientists

The task of a data scientist is to gather, process, and present data using advanced statistical methods, including **artificial intelligence and machine learning**. Whether it is to improve how you serve customers, hire and retain drivers, maintain equipment, or manage the profitability of a fleet, data is quickly becoming the “new fuel” for the trucking industry.

Product Engineers

Product engineers are involved in the **design, manufacturing, testing, distribution, marketing, and sales** of commercial vehicles. They work on aesthetics as well as technical performance, electronics, and software in trucks, engines, trailers, and all other trucking components.

Software Engineers

Software Engineers develop and maintain software solutions that **enhance the efficiency, safety, and overall operations** of trucking companies and companies that support trucking.

SAP Process Managers

This position is responsible for **supporting the supply chain process** at the manufacturing sites through strong systems utilization of the ERP system (SAP) through strategic continuous improvement. They **drive process standardization and improvements** in the areas of production and demand planning processes.

Have you considered?

Trucking Careers

OVER 70% OF ALL GOODS ARE BROUGHT TO YOU BY TRUCK.

Trucking is an essential industry.

Approximately 8 million people are employed in trucking related jobs today. 3.5 million people are truck drivers and the rest work outside of the truck.

Be a Part of a Team

When you become a part of the trucking industry, **you will join a team of experts.** We will give you the experience and mentorship you need to succeed.

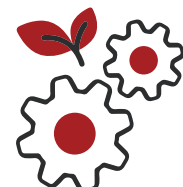

Advance Your Career

Trucking is growing in both cities and rural areas, so you can **put your skills to work anywhere.** With openings at all levels and room for advancement, you can build a successful career here.

Strengthen Your Community

Trucking keeps the country stocked with everyday goods and moves 12 billion tons of freight per year. **Truck drivers restock supplies** when there is a natural disaster and are first responders to help communities in need.

Environmental and Technological Advancements

During the past decade, improved technology has **cut truck emissions by 95%.** Today, drivers and their trucks are utilizing the latest technology, GPS, electric vehicles, hydrogen fuel cells, autonomous trucks, sophisticated safety systems, and more.
